**Visalia**

*The only important thing about design is how it relates to people.*

— Victor Papanek

As social spaces in offices evolve toward a more residential aesthetic, the sweet spot in seating is lounges that feel crafted and inviting. Visalia hits the sweet spot.

## CRAFTED FOR COMMERCE

---

The Visalia Lounge Collection from Coalesse is a cultivated departure from the sameness of office “house style.”

Visalia works a room. A sculpted Tuxedo-style lounge, its quality-stitched upper and lower upholstery facets and slim aluminum base give designers the opportunity to play with expressive two-tone motifs.

With Visalia, users can touch down, sit back, and confer. Efficiently scaled, it can be grouped to promote collaboration, or arranged for relaxed reflection in offices, lobbies, even homes.

The Visalia Lounge Collection. Crafted for commerce. Sensibly accommodating. Spot on.

The Visalia collection is available in one, two and three seat lounge versions, an ottoman and a two seat bench. All are available with contrasting stitch option.
